

I am writing in regards to the no-call list. I think we need to stick to our guns and I don't think any company should be allowed to change anything about it. Funny how the people that are trying to change this so that they can bother us at home are the same ones who have unlisted phone numbers and don't want their numbers available yet it's ok to bother people at home. Please don't allow any amendments that would allow any organizations to call and bother people.

Thank you.

Tony
